## Venison and it's benefits

Meat from deer has been important in the human diet since prehistoric times .

Demand for venison has been increasing year on year due to its natural qualities as one of the healthiest meats available and we are perfectly placed to provide you with a constant supply of high quality venison. Venison contains gram for gram less fat than a skinless chicken breast and has the highest protein and lowest cholesterol content of any other major meat. It is also completely sustainable.

## About us

Here at **HFV Parkland & Wild** we have been farming and supplying consistent quality venison for over 20 years.

We process our meat in our EU approved factory near York and supply the retail and catering industry as well as online customers. We carry BRC Global A certificate of competence for our factory systems and procedures, and all of our meat has full traceability and quality assurance.

## What can we provide?

### Catering and retail trade

Our **farmed, parkland and wild venison is available all year** round which means we can deliver a constant and consistent supply.

As a catering, retail or trade customer we can offer fast delivery and trade prices. Our team of in house butchers cut all our venison to order allowing customers to choose the size and

specification they need whether retail ready packed, vac packed or as individually specified.

### Mail-order

As a family business we pride ourselves on being able to offer a personal service which can supply all our products fresh right to your door from our website. All of our venison is sent out packed in ice and a cardboard box with wool cool liners to ensure optimum temperature. As our products are sent out fresh they are all suitable for home freezing.

## Why buy venison from us?

Our venison is

- High quality and cut to order by our team of specialist butchers.
- Easy to order from our dedicated Customer Service team.
- Fully traceable and quality assured for both our wild and farmed venison.
- Order Day 1 for Day 2 delivery.
